

STELVIO

A UNIQUELY ALFA ROMEO TAKE ON THE SUV

Alfa Romeo has always created unique cars that put the driver and driving pleasure at the heart of their design. That's the formula behind a string of models, brimming with character, that have become beacons in the automotive landscape.

Today, Alfa Romeo is writing a new chapter in its magnificent 107-year history, with the Stelvio: an SUV made the Alfa Romeo way. The car draws inspiration from the legendary mountain pass with over 75 hairpin bends in quick succession, widely seen as one of the most beautiful and engaging roads on the planet. Because it's in the curves that a car shows its true colours. And that's where Alfa Romeo excels.

UNMISTAKABLE HANDLING

BORN FROM THE WORLD'S GREATEST DRIVING ROAD

Like no other SUV, the Stelvio reconciles conflicting characteristics. Ride height and habitability blend harmoniously with driver appeal. Because the design comes from a sporting mindset. Beneath the Stelvio's skin, there's a Giulia – the state of the art in driving pleasure. So the Stelvio combines the load capacity and versatility of an SUV with the performance of the latest benchmark in sports saloons. It rewrites the rules of the class, to become the ideal car for people who won't settle for less.

PASSION INSIDE

It's hard to remain indifferent in the face of so much technology and such performance. At the heart of the Stelvio, you'll discover a gutsy engine with an all-aluminium block. This delivers a light-weight, high-performance operation effortlessly combined with eco-integrity.

The patented Q4 all-wheel drive system, ensuring rugged off-road performance when you need it most, is driven by a powerful 2.0-litre, 206 kW petrol engine, engineered for a smooth yet vigorous drive.

The all-commanding engine is available with a state-of-the-art 8-speed automatic transmission that optimises response in terms of fluidity, comfort, performance and efficiency. It's the true definition of passion.

NEVER LEAVE A CURVE UNTURNED

Every single line of the Stelvio bears witness to Alfa Romeo's uncompromising quest for "necessary beauty", or to put it another way, form born of function. That's why the solid, sizeable proportions of the SUV generate a striking new harmony with the brand's defining features. The contours of the front end yield a first-class drag coefficient (despite the car's volume), without sacrificing Alfa's hallmark trilobe. And never before has a car of this height had such sporting dynamism. The sinuous musculature of the flanks appears to project the car forward even when it's standing still.

So the Stelvio has a static dynamism that raises the pulse even before you get behind the wheel.

HOST EVERY SENSE

Alfa Romeo style just reached new heights. The Stelvio looks after you with its exquisitely finished interior, where space and material harmony are the first things you perceive.

In keeping with the highest Alfa Romeo tradition, the driver takes centre stage and has full command of the controls and the road ahead from the typically enveloping - but now raised - driving position, which seamlessly integrates man and machine. And the Stelvio's habitability extends to the passengers too, so that everyone on-board can enjoy the highest levels of safety and comfort wherever the road takes them.

The shared pleasure of a cabin designed, right down to the last detail, to exhilarate the driver and pamper the passengers. That's the Stelvio too.

Spacious surfaces, Walnut and Grey Oak wood, Haptic Aluminum, Mosa and Luxury leather, and technical fabrics; all selected materials finished with the unique craftsmanship of Italian know-how.

For a sports-oriented interior that's cosseting too, in typically Alfa Romeo style.

The second row seats three adults in comfort, with easy access and plenty of leg room and knee room.

And there are plenty of storage compartments too, for everything you might need on the road.

The trunk is another of the Stelvio's strong points. With an electrically operated tailgate and up to 525 litres of fully usable space that's made even more versatile by the independently folding rear seats.

A NEW TRIP WITH A LITTLE TWIST

Simply turn the Alfa™ DNA drive mode selector, and the Stelvio is ready with the perfect set-up for the road or the driver's mood.

There are three different drive modes to choose from, which completely transform the car's dynamic performance. The adjustments affect the engine's torque curve, brakes (via the Pre-Fill device), transmission logic, accelerator response, stability control system (ESC) and traction control (ASR). The result is a car with three distinct characters, so you can make every journey suit your mood.

A SINGLE GESTURE TO DOMINATE THE ROAD

Electronics are an integral part of every modern car and help deliver levels of performance, safety and driving pleasure that were unthinkable until a few years ago.

On top of all this, the Stelvio benefits from all-wheel drive with Q4 technology, the innovative on-demand system that combines the advantages of four-wheel drive with the driving pleasure that only rear-wheel drive can deliver.

The Q4 system includes an active transfer case and front differential designed to meet the specific technical requirements of Alfa Romeo and responsively handle high torque levels with a particularly compact, lightweight set-up.

It works by constantly monitoring road conditions and driving style, and optimising torque distribution between the front and rear axles, to maximise grip and handling on every road surface.

In normal conditions the Stelvio acts like a rear-drive vehicle, with the Q4 system sending 100% of the torque to the rear axle, but if the system detects rear-wheel slippage it transfers up to 50% of the torque to the front axle in real time.

The result is impeccable performance everywhere: on a hairpin bend, an unsurfaced track, or when cornering in driving rain. With the Q4 system, you really can have more stability when you need it and maximum performance at all times.

HEAD FOR NEW HORIZONS IN COMPLETE SAFETY

On the Stelvio, even the active safety systems are of the highest level, and contribute to intuitive driving, with a range of input levels to prevent risks and avoid hazards.

Integrated Brake System (IBS). An electromechanical device, which combines the functions of both the braking system and the stability control system. It offers high-precision braking inputs from the pedal, cuts out vibration when the ABS cuts in, and works with the powerful, responsive braking system to bring the Stelvio from 100 km/h to a standstill in less than 39 m.*

Lane Departure Warning (LDW). A video sensor installed on the windscreen recognises the lane markings on the road surface and alerts the driver with audio and visual warnings if the driver moves out of the lane involuntarily or fails to use turn signals.*

Forward Collision Warning (FCW) with Autonomous Emergency Brake (AEB) with pedestrian detection and active braking. This system alerts the driver to the risk of frontal collision with acoustic and visual signals, before activating the braking system as necessary.

Below 65 km/h around town, what's more, it detects pedestrian presence in the car's direction of travel and applies the brakes automatically if the driver can't react in time.*

*Standard

Blind Spot Monitoring (BSM). Two radars mounted in the rear bumper continuously monitor the blind spots behind you on both sides of the vehicle. In the event of a potential risk situation, the system triggers warning lights on the door mirrors, to alert you to the presence of obstacles alongside the vehicle.**

Rear Cross-Path Detection (RCPD). This system monitors the road behind you when you're reversing, and alerts you if another vehicle approaches at right-angles at less than 35 km/h.**

Adaptive Cruise Control (ACC). Keeps your car at a constant cruising speed and monitors its distance from the car in front at all times. If this distance falls below the safety threshold, the system slows your car down. As soon as the road ahead is clear again, the Adaptive Cruise Control automatically returns your car to the selected cruising speed.**

**Optional

BALANCE IS A WORK OF ART

OPTIMAL WEIGHT DISTRIBUTION

Excellence is a balancing act that you can't make up as you go along. Dynamic excellence was a priority in the design of this SUV, and it can only be achieved through perfect 50/50 weight distribution between the front and rear axles. The result is driving pleasure, speed and agility, despite the imposing size of the car.

MINIMIZE THE WEIGHT MAXIMIZE THE EFFICIENCY

The Stelvio offers a first-class power-to-weight ratio through extensive use of ultra-light materials, such as carbon-fibre for the driveshaft, and aluminium for the bonnet, doors, rear hatch, front and rear fenders, engine and suspension. The result is higher efficiency, better driving dynamics and lower fuel consumption and emissions.

MOVING SCULPTURE

STELVIO SUPER

Super trims are available with the following engine:

- 2.0 Turbo Petrol 206 kW AT8 Q4

SUPER

- 18" 10 Split Spoke Alloy Wheels
- Front and Rear Parking Sensors
- Rear Parking Camera
- Uconnect Touch 8.4N DC/DVD/MP3/NAV
- VDC - Vehicle Dynamic Control
- Power Liftgate
- Instrument Panel with 7" Colour Tft Display
- Stop & Start (S&S)
- Tyre Pressure Monitoring System (TPMS)
- Electrochromic Internal Rearview Mirror
- 8 Speakers
- Power Folding Heated Mirrors
- Steering Wheel Controls
- Leather Steering Wheel
- Automatic Headlight Activation (Dusk/Dawn)
- Hill Descent Control
- Full Leather Seats
- Specific Exhaust Tailpipe
- Lane Departure Warning (LDW)
- Integrated Brake System (IBS)
- Autonomous Emergency Brake (AEB)
- Forward Collision Warning (FCW)
- USB Charging Port
- Rain Sensor
- Specific Brake Calipers (Red, Yellow & Black)

Red leather upholstery (Opt)

Chocolate leather upholstery (Opt)

Black leather upholstery (Opt)

Stelvio First Edition is available with the exclusive 2.0 Turbo Petrol 206 kW with 8-speed automatic transmission and Q4 all-wheel drive.

FIRST EDITION - IN ADDITION TO SUPER

- 20" 10 Spoke Alloy Wheels
- 10 Speaker Hi-Fi Audio System
- Blind Spot Monitoring System (BSM) with Cross-path Detection
- Chrome Surround Moulding DLO
- Exterior Door Handle Courtesy Light
- 35W bi-xenon headlamps with Adaptive Frontlight System (AFS)
- Heated Front Seats
- Heated Steering Wheel
- Tinted rear windows
- Black full-grain leather upholstery
- Keyless Go
- Paddle Shift on Steering Column
- Power 8-way Driver Memory 8-way Passenger Seats
- Sport Pedals
- Sport Steering Wheel
- Sunroof with Electrical Drive
- Headlight Washer
- Nobel Wood Lining
- Automatic Headlight Leveling System

PACKS

SPORT PACK

Optional (92N)

- Aluminium inserts on dashboard, central tunnel and door panels
- Leather sports steering wheel
- Aluminium sport pedals

COLD WEATHER PACK

Optional (8M2)

- Heated front seats
- Heated steering wheel
- Heated windscreen washer nozzles

DRIVER ASSISTANCE PACK PLUS

Optional (8M4)

- Front parking sensors
- Blind Spot Monitoring (BSM) with Rear Cross-Path Detection
- Electrochromic door mirrors
- Electrochromic rear-view mirror
- Rear camera with dynamic parking assist guidelines
- Automatic high-beam headlamps

PACKS

SOUND THEATRE PACK

Optional (8PK)

- Bose Hi-Fi audio system with 10 speakers
- Interior ambient lighting

SOUND THEATRE PACK BY Harman/Kardon®

Optional (8PJ)

- Harman/Kardon® hi-fi audio system with 14 speakers (incl. subwoofer)
- Interior ambient lighting

CONVENIENCE PACK

Optional (9NP)

- Keyless entry
- Courtesy lights on exterior handles
- Athermic windscreen

LIGHTING PACK

Optional (8LZ)

- 35W Bi-Xenon headlamps with AFS
- Headlight washers

ELECTRIC SEATS PACK

Optional (8M8)

- Driver seat with 6-way electrical adjustment and memory
- Passenger seat with 6-way electrical adjustment
